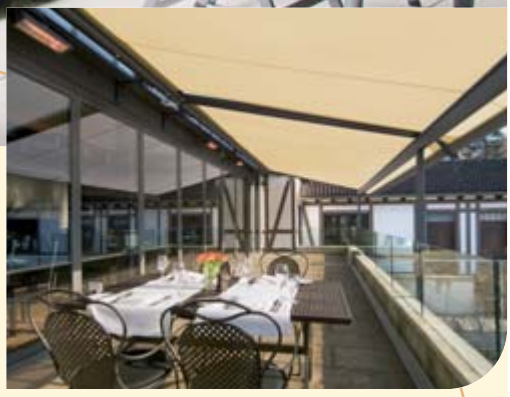
weinor Plaza Home and weinor Plaza Pro



Perfect weather protection for you and your guests

The weinor Plaza Home and weinor Plaza Pro textile patio roofs create snug, cosy spaces with *their sturdy construction and special charm*

www.weinor.com

Relax al Fresco | weinor

Create a snug, cosy space with the textile weather roof!

Perfect weather protection for all kinds of patios thanks to tried-and-tested technology and combinable system components

Vertical awnings, heating and lighting can be used to create a cosy area, giving you a longer patio season – all of which is available from weinor.

With **weinor Plaza Home** and **weinor Plaza Pro**, you benefit from the best possible protection from the sun, wind or rain. Since the weather roof can be made with a higher pitch than the awning, any rain that hits a roof pitched at 14° or higher will drain off in a controlled manner. The textile weather roofs provide for an especially generous projection no matter how wide the unit may be. This comes from the sturdy posts which offer high stability and wind resistance. When the elements show themselves from their prettier side, simply use your weather roof to shelter from the sun.

Weather roof against the house

Would you like to put a roof over an open space directly adjoining your property? If so, weinor's facade mounted **Plaza Home** or **Plaza Pro** provide the ideal weather protection. The **weinor Plaza Pro** has an overhang with uniform hip, whilst overhangs of up to 1 metre are possible with the **weinor Plaza Home**.

Free-standing all-weather marquee

Ideal for sizeable gatherings or outside catering: two **weinor Plaza Pro** awnings can be fitted to the free-standing **weinor Duofix** supporting structure. Very large areas can be shaded as a result of the double projection. Screw-on or flexible stone bases can be fitted to add stability to the unit.

weinor accessories with huge selection of colours

Choose from 47 standard frame colours, 8 scratch-resistant and robust trend colours as well as another 200 special RAL colours for your awning.

weinor Plaza Pro – the spacious weather roof

With its hipped curved shape, the patent pending **weinor Plaza Pro** textile roof provides for controlled rain drainage when projected (roof pitches of at least 14°). As a result, it is exceptionally well suited as a flexible weather protection for the catering trade. Generous sized spaces up to 5 m wide and 6 m deep can thus be shaded. Multi-section units can also be used if even larger surface areas need to be protected. ▼

weinor Plaza Home – the dainty weather roof for your home

Totally secure in sun and wind – textile weather protection on sturdy posts

The **weinor Plaza Home** is the ideal solution for very deep patios. With a maximum width of 6 m and depth of 4 m, the **Plaza Home** is also the perfect option for private homes and outdoor catering alike. The dimensions of the **weinor Plaza Home** make it particularly effective for shading terraced houses. When pitched at 14° or higher, this sturdy construction can remain open in the rain for longer than an awning.

Aruba, VertiTex *or* ***Paravento*** *– vertical awnings that provide vertical protection allow you to close your textile roof completely. As an optional extra, the* ***weinor Plaza Pro*** *can be supplied with a parapet.*

Comfort with the remote control

You can operate the **WeiTronic Remoto** remote control to adjust shade, heating and light from your favourite chair. You can even adjust the light and heating.

It's all in your hands: clever accessories for your comfort

The Light Bar Lux Design creates a pleasant atmosphere

With the Light Bar **Lux Design**, you can always put yourself and your guests in the right light. The light bar is easy to fit and can be operated by hand or remote control. You can use the light to create a pleasant atmosphere on your patio.

The patio heating makes the season longer

The heating system **Tempura** provides cosy warmth and makes your time under the weather roof a more pleasant experience. High energy-saving potential: the high-frequency thermal waves from the **Tempura** patio heating system penetrate the air without warming it and produce heat where it is needed.

CLIC-FIT *With an average service life of 5,000 hours, you will find these quality heating tubes very persuasive. Replacing the tubes is quick and simple with the Clic-fit-System.*

Reacting to all weathers: WeiTronic weather sensors

The **WeiTronic** weather sensors are available as just a sun sensor, a sun and wind sensor, or a sun, wind and rain sensor. Depending on the version, they automatically open the weather protection in the sun if needed and retract it in the wind and rain. That way, they provide protection and safety, even when you are not at home.

Quality standards weinor Plaza Home/Plaza Pro

Whether acrylic or polyester – beautiful fabrics to suit your needs

weinor Fabric range moments

weinor WeiTex polyester fabrics

Combine the wide range of frame colours with over 140 exquisite fabric patterns from weinor's **"moments"** fabric collection. Or take advantage of our **WeiTex** polyester fabric collection:

- ideal for large units due to their high fabric stability
- minimal wrinkling and creasing
- high resistance to ultraviolet rays
- long-lasting brilliant colour

weinor fabrics, with their high quality workmanship and tear-resistance, are noted for their exceptionally long lives. Special finishing processes also make them particularly UV resistant. Use of the latest nanotechnology gives weinor's fabrics dirt- and water-repellent properties.

We are offer the very highest quality

weinor puts a lot of emphasis on quality, from the design and materials to workmanship, mounting and service, so you can enjoy your **weinor Plaza Home** or **weinor Plaza Pro** for a long time.

Best weinor quality –

a well-conceived system from a single source

weinor Plaza Home ▲

weinor Plaza Pro ▲

Made in Germany – certified top weinor quality

Quality is our first commandment. That is why most of our products are certified by the German TÜV. weinor invests a lot in the development of new products. The result: innovative products made in Germany.

Longevity
We don't cut corners on the big or small parts: All our small parts such as screws, nuts and bolts are made of stainless steel so they will last a very long time. All other parts are powder coated in an elaborate process. This makes them impact- and scratch-resistant.

Tensioning system
The same tear-resistant and high tensile rope used in sailing technology on the high seas ensures that the fabric is always well tensioned. At the same time, the patented combined coiling and guiding system allows for controlled, silent winding of the cord.

Wind safety
The use of posts in the substructure means your **weinor Plaza Home** or **Pro** is doubly protected from gusts of wind from below. They also are the reason why depths can be achieved that other awnings cannot match.

Good advice from your specialist

To design and implement a textile patio roof, you need an expert partner who listens to your needs. Your weinor dealer will be happy to answer any questions you may have. Each **weinor Plaza Home** or **Pro** is made exactly the way you imagined it.

Qualified maintenance
To keep the beauty and value of your **weinor Plaza Home** or **Pro**, it's vital that it is professionally cleaned and maintained at regular intervals. With this in mind, maintenance agreements are available from your weinor dealer.

Description	*Patent-app. no*
Awning	*DE102008029012.2*

Important Informations:
For textile sun protection: *Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fish-bone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for protection from the sun and should be rolled up in rain and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).*
For patio roof, Glasoase®, conservatory: *contact a qualified conservatory builder for information on the causes of condensation and occasional cracking noises, and on how to avoid these from the outset during the planning stage.*
